⬜ E-Commerce Watch Store — Project Documentation

1. Project Overview

Project Name: Just In Time
Objective: To develop a responsive, user-friendly e-commerce website focused on selling men's, women's, and smart watches with brand highlights, featured sections, and a seamless shopping experience.

2. Folder Structure

```
/watchstore
├── index.html
├── product.html
├── cart.html
├── contact.html
├── /css
│   └── styles.css
├── /js
│   └── script.js
├── /images
│   └── (All images/logos here)
├── /data
│   └── watches.json (if using JSON-based watch list)
└── README.md
```

3. Core Features

- Homepage:
  - Banner
  - Category Tabs (Men, Women)
  - Featured Watches Carousel
  - Brand Highlight Section
  - Grid of Popular Products
- Product Page:
  - Mens Watch – Womens watch
  - Price, Name, Brand

Filters:
- Brand Filter
- Price Range

- Footer:
- Company Info

- Policies and Help Links

4. Technologies Used

- HTML5 – Structure
- CSS3– Styling
- JavaScript – Interactivity
- 5. Key Functionalities (JS)
- Horizontal scroll carousels (featured watches)js
- Watch auto-slider with logo highlight
- Responsive grid layout
- Logo-image sync every 10 seconds
- Filter functionality (optional if building dynamic version)
- Add to Cart logic using localStorage (for small setups)

6. Responsive Design

- Mobile-first approach
- Media queries for breakpoints
- Logos/grid stacked on smaller screens
- Hamburger menu for nav

9. Future Enhancements

- Dynamic product backend (Firebase / Express)
- User reviews
- Product comparisons
- PWA (Progressive Web App)
